### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-13 are allowed due to a lack of showing by the prior art of record an absorber element having a light focusing unit, an outer tube composed of a translucent mater and an absorber which is arranged in the outer tube and to which solar ray are passed by the light focusing element unit, wherein the absorber is surrounded by alt least one reflector channel, whose surface has a low emission and absorption capability, and which reflectors heat eradiation which originates from the absorber back to the absorber; a focal line of the light focusing unit lies on center axis of the outer tube, and the absorber does not lie on the center axis of the outer tube; an opening gap in the at least one reflector channel lies on the center axis of the outer tube and the solar rays fall on the absorber through this opening gap; and the absorber includes an absorber tube, through which a heat carrier medium circulates, and absorber plates which are mounted on the absorber tube, and with the absorber plates being curved such that they essentially completely absorb the solar rays which are incident on them through the opening gap.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3749

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Each of Marks, Lechner, Jonsson, Harrison, Shoen, McDougal and Meckler is cited to show a high temperature solar energy concentrator and collector system.
